

Can't be opened? Here's the trick...

1. Did you get the "Can't be opened" message? Here's an easy fix!

Changes by Apple in MacOS Mavericks and Yosemite created a temporary problem with launching existing programs like Game Show Presenter. Not to worry. Follow these steps for Apple's own workaround.

Can't be opened? Here's the trick...

2. Fix it in no time! Here's how:

1. Open the **Game Show Presenter PLUS** folder (probably on your desktop).
2. Hold down the **Control** key as you click once on the icon for "**Game Show Presenter V6 OSX**". This brings a pop-up menu to the screen.
3. Choose **Open** on the menu and click on **Open**. Your Mac will present the "**Can't Open**" message one last time. Click **OK** and it will open. You're done! Now the program will open any time you doubleclick it.
